Ford explorer paint code

Method 1 of Look on the driver's side front door panel. If you open your door and look along the side of the door, towards the bottom you should see a manufacturer's label. This will contain the color code. Modern manufacturing labels typically have a barcode printed on them, while older examples may not. Check the driver's side front door jamb. The majority of Fords will have the manufacture's label on the front door panel. Open the front car door on the driver's side. Look at the small ridge around the doorframe on the inside of the car, usually blocked when the door is closed. Locate the color code on the manufacturer's label. Once you've found the manufacturer's label, you can use this to locate the color code. The color code is found below the bar code and is usually marked by 2 characters, which can be either numbers or letters. The 2 digits are listed above or next to the words "exterior paint colors. They may also consist of a mixture of letters and numbers. Method 2 of In the event your manufacturer's label is missing, you can use your vehicle identification number to find your color code. You can either contact the Ford company or look the code up online. Your VIN is usually listed on the lower left-hand corner of the dashboard, just in front of the steering wheel. You can read your VIN by looking through the windshield. Check other locations if the VIN is not under the dashboard. Usually, you should have no problem finding the VIN by looking through the dashboard. However, if your VIN does not appear there, you can look in a variety of other locations. The VIN may be listed here. You may also find the VIN near the front of your car's frame, next to the frame of the windshield. You can try opening your driver's side door and looking inside the door frame. You may see the VIN roughly where the side-view mirror would be if the door was closed. You may also see the VIN near where the door latches closed. Call the Ford company to ask about your color code. As long as you provide the VIN, someone at Ford should be able to let you know your color code. You can call the Ford company at Make sure to call sometime between Monday and Friday, as the company is closed on weekends. Enter your VIN on a website. There are various websites, such as Chipex, where you can type in your VIN. The website will be able to provide you with your color code based on your VIN. You may want to call the Ford Company, however, just to double-check that your code is accurate, as websites you find through an Internet search engine may not be officially affiliated with the Ford Company. Method 3 of Do a search for an online paint color library. Fortunately, there are numerous websites that allow you to search for Ford color codes using basic information about your vehicle. Websites for Ford enthusiasts, such as MustangAttitude. Enter the year and make of your vehicle. Depending on the format of the color code database you are using, you may be able to narrow your search by selecting the year, make, and model of your Ford. In other cases, you may simply be able to browse a list of color codes for each year. Examine the list of colors in use that year and find the best match. Ask around on communities such as FordForum. MA, WS. MA, ZY. Vapor Silver Metallic. A paint code is used to match your color of paint. All Fords have a paint code. Once you know where to look the code should be easy to find. You will need this to order Ford touch up paint. The paint will be specific to the color, model, make and year of your vehicle. This is why you need to confirm the code on your vehicle. Ford vehicles have a label affixed to the inside on the driver's door. On the label is a two digit code. The code can be letters or numbers. It will be next to the words "Exterior Paint" or "Ext Pnt" or something similar. Samples are shown so you can see where the label is located and where the paint code is found on the label. There are a couple reasons why. First, old paint is bad paint. You do not want to be putting paint on your car that has been sitting on a shelf, or supply room, for a long time. Second, you want OEM Ford paint with a color match guarantee. Otherwise, putting on mismatched paint may make your vehicle look worse than it currently does. There are only a couple OEM manufacturers of auto paint. They have state of the art machinery used to precisely create the correct color of paint for your Ford. The company has a color match guarantee to match the original color of your Ford. The look and quality of paint if excellent and at the same time very affordable. Recently used Ford paint codes include these descriptions and chip colors. These are not all available colors and codes - if you do not see yours listed - but the list includes popular colors recently used by Ford. Small chips and scratches can be quickly fixed with a paint pen. Paint pens are better suited than aerosol paint to fixing small areas. Mask off the section of your vehicle so you only apply touchup paint to the section needing repaired. By making use of a blending technique you can make your touch up work less obvious. Not just quantity of paint, but additional products to help ensure. Here are common products used for Ford touch up paint repairs:. You want the area to be painted to be clean and smooth. Aside from general cleaning, using sandpaper is often the best method for preparing the metal for painting. For general cleaning make sure the area is clear of dirt, oil, and grease. As with other paint, primer helps your basecoat, or paint, better adhere to the metal. Primer is applied directly to the metal and several coats of primer are often used. This is your vehicle paint and what one normally thinks of when ordering paint. If you want 'red paint' and someone mentions 'red paint basecoat' - you are talking about the same paint. Basecoat is used over the primer. Nothing else should be used between the primer and basecoat. Again, several layers of paint should often be used. These layers will give your paint the gloss that matches the original, surrounding paint color. Several layers of clearcoat should be applied. The type of Ford touch up paint you purchase depends on the size of area that needs retouching. For large areas get can s of paint. If you use a paint gun this is the type of paint you will need. Then there is spray paint. These are aerosol can that spray paint onto a surface. Due to the nature of aerosol you will want to mask off and cover areas you do not want to paint. Finally, for small areas there are paint pens. You should always have a paint pen on hand. Not only for small chips and scratches that commonly appear from normal vehicle use, but also to ensure small area and edges are properly painted. These are areas that paint guns, spay paint, or brushes may miss. Paint is a toxic substance. Read the instructions for using and storing your paint. Some general guidelines you will want to follow:. Paint fumes are flammable and invisible. If you are in your garage, make sure your garage door or side door is open. If needed call Get yourself into a ventilated area, such as the

outdoors. When your condition has returned to normal go back to painting, but first adjust the working area so you have more ventilation. If it is cold this means more than heaters, blowers, or fans. You need inside to outside air flow so you are not breathing paint fumes. If you get paint on your skin immediately clean it off. Paint should not be handled if you are pregnant. Ford produces a wide lineup of cars, sport utility vehicles and trucks. Click Here to Start Your Order. Click Here for a Graphic. Blue Candy Tint Metallic. Frozen White. Oxford White. All Ford Explorers should have an easy to locate code listed on the sticker on the side of the drivers door. This code is your paint color. The paint code is your key to ensuring you get the right color of paint. Ford uses a LOT of paint colors - many with only slight variations in shade. These variations will be very noticeable if you try to touch up paint of one color with another color. Finding the sticker is the easy part. The harder part is deciphering the sticker to determine amongst the mass of data whichi s your paint color code. Go Here for a Picture showing s sample sticker and where the paint code you are looking for can be found. Using the below list of codes, color descriptions and paint chips you can quickly confirm you have found the right Explorer paint code. They have excellent direct to consumer pricing. Even better, they make fresh paint for you and guarantee an exact color match for your Ford Explorer. Few motor vehicle paint manufacturers use quality paint and have the technology to precisely match vehicle paint colors. AutomotiveTouchup specializes in the auto industry. Ford does not manufacturer its own paint. Rather, as with many parts the Ford name may be put on something created by a specialty manufacturer. Instead of paying a higher dealer markup or paying a middleman, we suggest you go direct with the OEM manufacturer. This gives you the best pricing and also provides you with a color match guarantee. Ford, a local dealer or auto store will not give you a guarantee like an OEM paint manufacturer. Go Here for a Picture. Carbon Black. Light Gray. Sterling Gray Metallic. MA, UJ.
