Ve vortex

From precision long-range shooting and tactical applications to maximizing effective range on open-landscape western hunts, the Razor HD AMG is the ideal riflescope for an extremely wide range of shooting scenarios. At just The next evolution of our wildly popular Razor line, the Razor HD Gen III x24 brings the highest level of first focal plane performance to those who demand the versatility of x power. Designed and engineered for dialing precision long-range shots in extreme environments, the 4. Built like a tank, specifically for the AR platform, the Razor HD Gen II x24 is the ideal optical solution for short- to medium-range tactical applications. Perfect for the AR platform, the Gen II-E is a top-tier optical solution for short to medium-range tactical applications. The Razor HD x50 riflescopes meet the demands of extreme hunting situations. One scope to rule them all. Stunning, High Definition optical system delivers a crystal-clear sight picture with tack-sharp resolution. Turn every second of legal shooting light into opportunity. Specifically designed for long-range, F-class, and other competition shooters. Upgraded features inside out take the Viper PST's incredible performance and rock-solid tactical features to new heights - and your shooting prowess with it. Hunting - Shooting - Long - Range. Built on ultra-strong 30mm one-piece machined aluminum tubes, the Viper HS LR offers increased elevation travel for optimal adjustment, specifically designed to extend your effective range. The advanced optical system is highlighted with a 4x zoom range for magnification versatility. Hunters and shooters of all stripes will welcome the array of features available on the Viper HS riflescopes. Choose the reticle best suited to your shooting style and enjoy the advanced optical system, 4x zoom range, MAG-view fiber optic, and fast focus eyepiece - all required attributes for the hunter looking to drag more than scent out of the woods. Viper riflescopes are rugged performers that hunters have come to rely on. Built using a one-piece aircraft-grade aluminum tube for strength and durability, the premium, fully multi-coated optics deliver the detail and color differentiation needed for hunting in any environment. Engineered and designed to perform where comparable scopes fall short, the Viper delivers. Executing technical, short, and long-range shots requires a riflescope with application-specific features and rock-solid build-quality to ensure accurate, reliable, and repeatable performance - every time you squeeze the trigger. Strike Eagle Riflescopes boast those features in a trim, lightweight, durable, package. All of the legendary performance and extreme durability the Diamondback name is known for with a tactical twist makes this series a true head turner. Argon purging puts waterproof and fog-proof performance on the checklist and the advanced, fully multi-coated optics raise an eyebrow when crystal clear, tack-sharp images appear in the cross-hairs. Clear, tough and bright, our popular Crossfire II line is built to exceed the performance standards of similarly priced riflescopes. Long eye relief, a fast-focus eyepiece, fully multi-coated lenses and improved, resettable MOA turrets are hallmarks of the series. Here is a riflescope that will have folks scratching their heads at the quality versus price ratio. The solid one-piece aircraft-grade aluminum alloy construction makes it virtually indestructible and highly resistant to magnum recoil. Add fully multi-coated lenses, a locking diopter ring, and Nitrogen purging and you have a quality scope with as extremely reasonable price tag. Add fully multi-coated lenses, a locking diopter ring, and Nitrogen purging and you have a quality scope with an extremely reasonable price tag. Home Riflescopes. Sonora Here is a riflescope that will have folks scratching their heads at the quality versus price ratio. Rings and Mounts A variety of sizes and designs for mounting scopes on your rifle. Accessories From flip caps and bubble levels to sunshades and riflescope covers, shop all the accessories you need for riflescope. Thursday brings snow and wind to eastern Minnesota, Wisconsin and Iowa. This weekend brings the coldest air of the winter season. Little or no snow will accumulate in western Minnesota. The Twin Cities rides the edge of the 1 to 3-inch zone. Heavier snow will fall in southeast Minnesota and Wisconsin. Mixed precipitation expected, with mainly snow after 6 AM. Some freezing drizzle and patchy blowing snow is also possible. Total snow accumulations of up to two inches and ice accumulations of a light glaze. Plan on slippery road conditions. Patchy blowing snow could educe visibility. The hazardous conditions could impact the morning commute. Winds will gust over 30 mph Thursday. That will cause blowing snow and poor visibility. Driving conditions will be difficult Thursday. Blizzard warnings are up for northern Iowa along Interstate We have our answer. Watch how the arctic floodgates open and a lobe of the polar vortex drives bitterly cold air into Minnesota this weekend on this upper air millibar loop. Forecast models gauge the coldest temperatures this weekend between about minus 15 and minus 30 across Minnesota. But they also often underestimate the magnitude of extreme events. My best assessment is that temperatures will range between minus 15 and minus 20 in the Twin Cities Sunday and Monday mornings. Minus 30s seem likely up north. Some of the colder nooks and crannies could approach minus Temperatures may stay below zero in the Twin Cities and much of Minnesota from Friday night

This was the quietest heater I have ever used. In addition, heater construction including housing, switches and dials were more robust than on similar units. I only wish the heat output was a bit higher. All these features include above average quality "analog" switches and dials that should outlast many of the cheaper heaters. There are no cheap electronics to complicate the operation or prematurely burn out. Sometimes simplicity is just better with something like a heater! Running the heater was extremely quiet. You could be running it all night long and not even know it is on. However, on extremely cold nights, it takes a good hour to heat up my 12 X 12 room on the highest setting. But, once my room gets warm, it seems to maintain the temperature decently. Housing construction is made from thick, quality plastics that would never melt or break with extreme use. I could feel the weight of the heater, telling me that heavy duty, thicker materials were used to build it. Heat output at the thick grill surface does not ever seem to get hot enough to burn combustibles like paper or cloth which would be good for children. I have owned a few heaters in this price range and can say that it is one of the best in terms of quality. I would easily give this heater 5 stars if the heat were a bit stronger to help "preheat" a cold room. After around 6 months of light use the motor failed and it started emitting a burned plastic smell if turned on. My expectation was that this would last at least 1 year, hopefully much longer. While this heater was working I was quite happy with it. When I contacted the seller at 8 months they refused to take a return. Note that this is not fulfilled by Amazon, so you will need to get authorization to return if there is a problem. Not all products will come off the factory line and last as expected, however, I do believe for the small percentage of products that fail, sellers should have a reasonable expectation of performance. My suggestion to others looking for a small quite heater is to go to another seller or through Amazon itself which has a more reasonable return policy. I used this in place of my gas heater, thinking it would reduce my environmental footprint after I switched to solar power. Not worth the extra expense. I really like this compact, efficient, nicely-made heater. It heats these rooms quickly, much more than the awful baseboard heaters in these rooms. I like the safety feature that turns it off if it is not solidly on the floor for some reason. I highly recommend this unit for heating a small to moderate-size area. Great product. It was only used intermittently in a small bathroom and in cool-cold weather, so it hadn't had a heavy work load at all during this time. One cold day about a week ago it simply would not turn on. Everything looked fine, though the on-off switch felt different. I am very disappointed, as all my other Vornado products, fans and 1 heater, have had much longer lives. I will try to return, but other reviewers' experience is not to encouraging. If Vornado and the sellers of their products want to keep their good name, products adnd return policies need to back that up. We live in a duplex down in Chicago. Needless to say, it gets cold on our lower floor. We needed something to supplement our heat and after research we went with the vornado. It also has a great safety feature in that it will turn off if it is lifted or knocked over. Quietest heater I've ever heard, and I'm a perpetual freezing cold old lady. You will not even know it's on. Many ways to adjust the temperature and fan output. Love this unit! Excellent product.. Had to check twice if it was on.. I knocked it over twice to check and it turned off immediately.. Good Deal.. One is good.. See all reviews. More to consider from our brands. Pages with related products.
